

Foods That Are Dangerous For Your Dog

- 1. Alcohol (Beer, Wine, Spirits) same effect on liver and brain that it has on humans with an even greater risk of illness.**
- 2. Avocado: Contains persin, a substance that can damage heart, lung and other tissue.**
- 3. Baby Food: May contain onion powder, which can be toxic to dogs.**
- 4. Bones: Cooked bones can splinter, get caught in the throat or cause a rupture or puncture of the stomach lining or intestinal tract.**
- 5. Bread Dough: Once ingested the dough will rise, causing discomfort. Alcohol is produced as the dough expands.**
- 6. Caffeine: Includes coffee, tea, cocoa, chocolate, colas, and stimulant drinks such as Red Bull. In large enough quantities can be fatal for a dog.**
- 7. Candy and Gum: Many types contain Xylitol, which can cause blood sugar to drop and liver failure.**
- 8. Chocolate: All types contain a toxic agent known as theobromine. Dark chocolate, chocolate mulch, and unsweetened baking chocolate are most dangerous.**
- 9. Corn Cobs: Can cause a partial or complete intestinal obstruction.**
- 10. Dairy Products: Milk and milk-based products may cause digestive upset as well as set up food allergies.**
- 11. Eggs (Uncooked): Can deplete your dog of biotin, which is essential to growth and coat health. Additionally, may be contaminated with bacteria, such as salmonella.**

- 12. Fish (Uncooked):** May be contaminated with bacteria that can cause food poisoning. Salmon, trout, shad, or sturgeon can contain a parasite that causes "fish disease" or "salmon poisoning disease", which can be fatal.
- 13. Garlic:** Can destroy red blood cells, leading to anemia. Includes powdered, raw, cooked, or dehydrated.
- 14. Grapes and Raisins:** Toxic when consumed in large quantities. Can cause kidney failure.
- 15. Macadamia nuts:** Contain a toxin, which can cause tremors and paralysis.
- 16. Moldy Foods:** Some types can produce a toxin, which may cause serious illnesses.
- 17. Nutmeg:** In large quantities is a hallucinogenic and can cause tremors and seizures.
- 18. Onions:** Like garlic, can destroy red blood cells, leading to anemia. Includes powdered, raw, cooked, or dehydrated.
- 19. Persimmons, Peaches, and Plums:** Seeds from persimmons can cause inflammation of the small intestine. Peach and plum pits may cause intestinal obstruction and contain cyanide, which is poisonous.
- 20. Salt:** Iodized salt and salty foods can cause stomach ailments and pancreatitis.
- 21. Tomatoes and Tomato Plants:** Contain atropine, (especially leaves and stems) which can cause dilated pupils, tremors and irregular heartbeat.
